

My, Art 385, CodeSelfPortraitP5, 02/13/2020

Assignment

We are coding our original self-portraits (in processing) into p5.js. We will be adding state machine commands and emotions into our portraits.

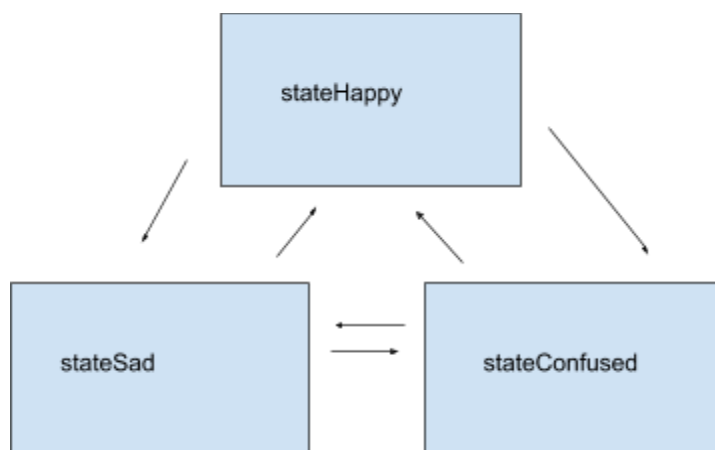

Audience

The audience is the professor and the other students.

Hand-drawn sketches

Interaction Diagram (Interface Design)

Reflections

Converting the processing sketch into a p5.js sketch was very easy. One part of this assignment was using state machines. I really appreciate the extra day we spent on state machines. Although I was able to implement state machines, my sketch is not as interactive as before. I wonder how I can implement the state machines but keep all the interactiveness as before. (I'll work on figuring that out)
